

LoanStar System

Service Requirements for Client Turnover

Service	Purpose
Vercel	Hosts and deploys the LoanStar web application.
Supabase	Provides the database, user authentication, file storage, and scheduled system tasks.
Domain / DNS Provider	Manages the system's custom domain name and DNS settings.
SMTP Email Provider	Sends transactional emails such as account notifications, approval/decline emails, and reminders.
OpenAI API	Powers AI-generated reports and the reporting assistant.

Note: OpenAI API is only required when AI reporting features are enabled.
